

“DEATH CAN WAIT” RADIO SPOT

SPEAKER:

As of January 2011, there are nearly 15,000 Michigan citizens living with HIV/AIDS and more than half of those cases are African-American. AIDS is the 5th leading cause of death among African American Males in our community and the 8th leading cause of death among African American Women. We are dying everyday, and HIV/AIDS is the culprit. But I'm here to tell you, that DEATH CAN WAIT. We invite you to stop the spread of HIV/AIDS by joining the “Death Can Wait” campaign. You don't have to sign-up or pay any fees. All you have to do is get yourself tested and start the conversation on HIV/AIDS Awareness with someone you care about. Tell them to get tested. Tell them that DEATH CAN WAIT!

ANNOUNCER:

For more information on the “Death Can Wait” campaign, please visit www.dabodetroit.org or call DABO at 313-491-0003 for a list of clinics. This message was brought to you by the Detroit Association of Black Organizations and the National Black Leadership Commission on AIDS.
